

Solutions for Sustainable Living

- Do you want your property to be more self-sufficient or productive?
- Have you fully explored the potential of your land's resources and capabilities?
- Are you spending \$000's to buy in water?

If you live on a rural property and want to build a self-sufficient and more productive lifestyle using the natural resources of your property, let us provide advice and solutions for you.

Solutions for Sustainable Living is an independent consultancy service providing innovative, creative, integrated and practical solutions for today's challenging rural lifestyle. We specialise in:

Design, advice and education on eco-systems for water, land and energy

- traditional approach to water-sourcing
- non-scientific evaluation on water quality and values
- water catchment, delivery and storage system strategies
- super-efficient low-energy solar power solutions
- closed-loop, organic growing and farming systems for optimum yield and maximum nutrition

Our philosophy is to work in harmony with Nature's systems to produce the most cost-effective, highest yielding results for our clients - minimising inputs, maximising outputs, naturally.

Solutions for Sustainable Living can provide you with an independent appraisal of your land in order to streamline your resources and explore potential opportunities.
